

# Do the check before departure with **Bumper** **Vehicle Check**

Your drivers are on the road every day. With a heavy load of responsibilities. But how do you know if tractors and trailers in your fleet are in top condition and safe on the road? Even minor damage can have major consequences: from breakdowns on the road to expensive repairs or even accidents. With Vehicle Check, the latest prevention tool in Bumper, we help you avoid downtime, unnecessary costs and, above all, unsafe situations. For the safety of your driver and everyone else on the road.

## Small effort, big result

- ✓ A simple and quick vehicle check
- ✓ Reporting damage instantly and passing it on to repairers
- ✓ Control the safety of every vehicle in your fleet
- ✓ Protect your drivers and others on the road
- ✓ Avoid unsafe situations, downtime and unnecessary costs

# A simple and quick vehicle check

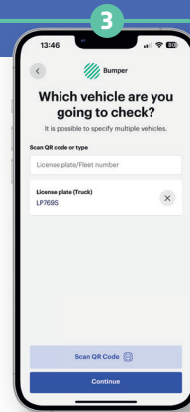

Vehicle check is the latest tool in Bumper that allows drivers to quickly perform an inspection. The check is ready for use in the Bumper app. Enter the licence plate number, check the vehicle inside and out, report missing items and reported damage digitally instantly. It's as easy as it sounds.

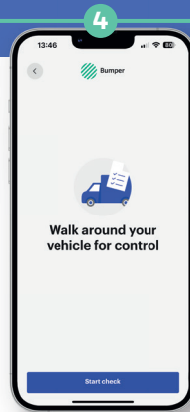

1 A safe journey starts with Vehicle Check

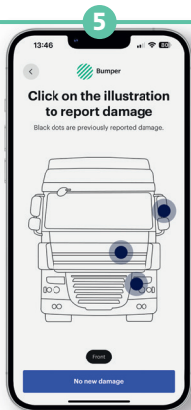

2 Start right from your personal dashboard

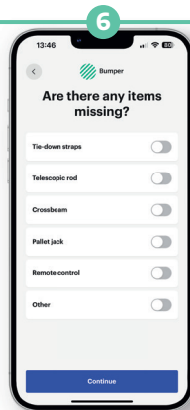

3 Enter your licence plate number and get started

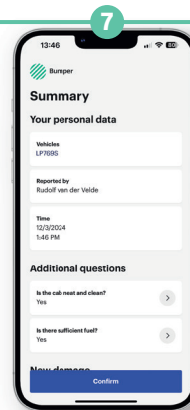

4 Check your vehicle easily

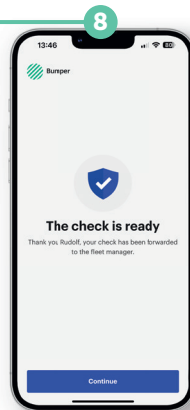

5 Report damage with no effort at all

6 Anything missing?

7 Send the check to fleet management

8 Ready to leave!

# Complete control over the safety of your fleet

The Bumper Vehicle Check gives you a very practical approach to prevention in your company. The check helps you to quickly identify unsafe situations and risks. You always have a real-time overview of all the checks carried out. No more hassle with loose forms or unclear reports. You can see at a glance which vehicles in the fleet need attention. Damage can be passed on to a body repairer and to TVM if you wish. Everything is done quickly and correctly, without you having to do anything extra. This saves time, avoids delays and ensures that vehicles are back on the road quickly and safely.

## DOWNLOAD STARTER PACK AND GET STARTED!
